BOGDAN GANCEAN

HOME MANAGER

Welcome to Brook House

Located in the market town of Towcester discover our new luxury care home with beautiful facilities and grounds to relax in.

I am very excited to be Home Manager and I am looking forward to developing my team, welcoming our first residents and their families and building up links between Brook House and the local community.

I first trained as a nurse in Romania and have also lived and worked in Italy. I have a degree in Psychology and experience in mental health care. I progressed my career by becoming a manager in neuro-care and rehabilitation and subsequently managed a large nursing and residential service before joining Caring Homes. I am currently studying for a Level 7 Leadership and Management Diploma at university.

Brook House is a state-of-the-art new home with beautiful grounds, activities and facilities. We have a high calibre chef to provide the best mealtime experiences and a fantastic Customer Relationship Advisor to help support you through your care journey. I will be aiming for perfection as I help select and mould my team here. This is an ongoing process but to be in at the very start of that process is a dream for a Home Manager.

I enjoy the challenges care home life can present and take my responsibilities very seriously, striving to maintain a safe and happy environment, promote great care and make a positive difference to all of our residents' lives. I like the fact that Caring Homes is still a family run business with strong values on care quality and improvement.

There is already an enthusiastic and compassionate team working here with me to deliver the highest standards of residential, dementia, nursing and palliative care. As Home Manager I want to support my team and ensure their professional development as well as my own, something Caring Homes provides a lot of support for.

I will be a familiar face out on the floor at Brook House and will be doing shifts providing care for our residents, I believe in maintaining strong relationships between residents and their relatives and understand the important contribution that these relationships, in conjunction with the relationships that are made with myself and my team, make to the successful running of a care home.

I don't live far from Brook House and have a young son and a new house, both of which keep me busy in my free time, I love cars and DIY. I enjoy seeing families getting involved in care home life and we will be running regular events here and building good relationships with the community.

I look forward to meeting you
